

Session – 1

Google Ads: The Fundamentals

Segment - 1

Module Overview

Think about the last time you searched for something online. Maybe you looked up 'best running shoes' or searched for 'weekend getaways near me'. Within seconds, you saw ads that felt tailor-made for you.

Today's consumers no longer follow a straight path; they browse, compare and explore across platforms. The challenge is to reach them at the right moment with the right message.

That is where the Google Ads platform makes a difference. It gives advertisers the edge to stay ahead by connecting with audiences where it matters most.

Welcome to the module titled '**Google Ads**', where we will uncover how this platform powers full-funnel marketing, from search intent to Demand Generation (also called Demand Gen).

By the end of this module, you should be able to:

- Explain the core fundamentals of Google Ads
- Produce Search campaigns to capture user intent
- Create Demand Gen campaigns for growth and performance
- Measure success using data, metrics and attribution

Let's begin the first session of this module, in which we explore the key fundamentals of Google Ads. This includes its objectives, structure and place in the digital ecosystem, i.e., the aspects of 'what, why, how and where' of Google Ads. We will also discuss the fundamentals of Search Ads, the cornerstone for all search-focused advertising solutions.

Guidelines for graded questions

Note that graded questions are given on a separate page labelled 'Graded Assessments' at the end of the module. These graded questions will adhere to the following guidelines.

	First Attempt Marks	Second Attempt Marks
Question With 2 Attempts	100%	50%
Question With 1 Attempt	100%	0

People you will hear from in this session.

[Kaushik Sen Deka](#)

Kaushik Sen Deka is a seasoned marketing strategist with deep expertise across the digital customer journey.
